AIRVISION
Air Processing Management

AIRVISION CARE

Concept

- We are developing an intelligent box which will display locally, and will enable you in a glance, to check the health and status of your fan.

Function

- AirVision CARE will measure state of vibration of your fan.
- AirVision CARE will measure state of temperature of your fan

Result

Green light ? everything is ok

Orange light ? pay attention

Red light ? Stop the fan

Your mobile

© Can Stock Photo

Your network

Your fan is not accessible ?
No problem, we will send
information to...

AirVision Care remote control

Remote control with 6 lights and buzzer

AirVision Care with GSM transmission

Transmission of alerts/alarms via SMS

AIRVISION CARE

Local box fixed on the fan with 2 PT100 and one vibration detector input.

6 lights Output and one buzzer :

- green PT100 = OK - Orange PT100 = Attention - Red PT100 = Stop

- green Vib = OK - Orange Vib = Attention - Red Vib = Stop

AirVision Care advanced

AirVision Care with Ethernet connection. Data Report in real time of analogic input. Possibility to keep last alarme and datas in memory.

AirVision Care advanced avec GSM

Idem with possibility de connect at distance and gather in "Real Time" information as well as x last alerts/alarms in memory. With transmission of alerts/alarms via SMS
