Solutions acoustiques

Dear [% Salutation %] [% Lastname %],

As from the beginning, AIR VISION is proposing a complete, well balanced and competitive range of industrial fans.

We are happy today to announce our collaboration with the german company ROTAMILL for which we have an exclusive representation for Belgium and France.

We are now able to propose industrial fans with impellers up to 4000 mm of diameter and installed powers up to 6MW!

You will find on our newly adapted internet site a presentation of **ROTAMILL**.

AIR VISION is now more than ever strongly armed and therefore able to answer to the most difficult technical challenges. Do not hesitate to contact us for any of your requests. We surely have the solution you need.

Best regards,

Dimitri
