AIRVISION
Air Processing Management

25 years of existence, that calls for a celebration!!!

Dear ,

Since its founding in 1999, AirVision has been committed to offering you the best solutions for all your needs in industrial fans, air regulation dampers, and acoustic solutions for ventilation.

We are still driven by the desire and passion to explore your processes and applications in order to choose, from our wide range of products and solutions, the best technical and commercial compromise.

Furthermore, AirVision spares no effort in sharing its expertise in the field of industrial fans, which we believe is essential for making good technical decisions and for the smooth implementation of our solutions.

25 years
AIRVISION
Air Processing Management

For our 25th anniversary, the best professional gift we can offer to our many clients is to tirelessly continue sharing our knowledge in a constructive spirit. How?

We are organizing a **training session** on **November 19th** for *French speakers* and **November 26th** for *Dutch speakers*. The training will take place at AirVision in Louvain-La-Neuve and is open to anyone active

in the field of industrial ventilation. This training is **free** and will conclude with an introduction to golf, a sport of perseverance and precision that aligns with our values.

Even better, **we offer customized training sessions at our clients' premises** with the only requirement being a *minimum of 5 participants*. This training is tailored to your needs, allowing us to focus on topics specific to your processes and applications.

Last but not least, each training includes a visit to our **virtual showroom**, offering a detailed discovery of the industrial fan, with construction details that will surprise you.

More information will follow. If you already would like more information or wish to register, please contact us by email at the following address: alexandre.rahier@airvision.be.

ATTENTION! Spaces are limited to a maximum of **10 people**. So don't wait to reserve yours.
